Professional Summary

Full Stack & React Native Developer building scalable mobile and web applications using MERN stack and cross-platform technologies. Skilled in API integration, performance optimization, and developing production-ready features for real-world users.

Technical Skills

Languages: C++, JavaScript, SQL
Frameworks and Libraries: React.js, React Native, Node.js, Express.js
Databases: MySQL, MongoDB
Tools: Git, Swagger, Bruno, Confluence, JIRA, Cursor

Experience

Software Developer I

Cysco Pvt. Ltd. *July 2025 - Present*

- Integrated **30+** REST API endpoints into a production React Native application, ensuring seamless frontend-backend communication and improving data reliability across key workflows.
- Developed geolocation feature with real-time address fetching and display functionality, improving user experience by automatically capturing and presenting location-based information within the application.
- Integrated OpenAI GPT API to develop an AI-based evaluation feature that automatically generated scoring and structured feedback based on user responses and predefined assessment parameters.

Full Stack Developer

Inwizio Technologies Pvt Ltd, Indore *Sept 2024 - June 2025*

- Developed and integrated a user registration module with OTP-based email verification using Node.js, Express.js, and MongoDB, resulting in a smoother registration for **over 1,000** users.
- Implemented JWT-based authentication, generating secure tokens that enabled access control for **100%** of protected routes, improving session management and reducing unauthorized access.
- Diagnosed and resolved **2 critical bugs** leading to a more stable and responsive web application.

Personal Projects

Smart Assist — AI Assistant with Document Intelligence (RAG) | *React Native, OPENAI API*

- Built an AI chat application with real-time streaming LLM responses and persistent conversation history, allowing users to revisit and continue past conversations.
- Integrated the OpenAI API with structured prompt design and response handling, including loading, error, and retry states for a reliable chat experience.
- Built a document Q&A feature where users upload files and chat with their content

Krishi Sahayak Portal | *Deep Learning Model*

- Engineered a machine learning-based portal to help farmers identify crop diseases with high accuracy using deep learning models.
- Built the web portal for image upload and prediction display, connecting the frontend to the trained model via a REST API for real-time disease diagnosis.

Certifications

- **MERN Full-Stack Web Development** Certification by **CodeBetter, 6-Month Training Program.**
- **Project Management Foundations** Certification by **LinkedIn Learning** and **Project Management Institute**.
- **IBM** Certification of **Generative AI for Software Development** and **Journey To Cloud**.

Education

Swami Keshvanand Institute Of Technology, Management and Gramothan **Dec 2020 – July 2024**

Bachelor of Technology in Computer Science, CGPA: 8.81 *Jaipur, Rajasthan*
